

Traffic and Weather in the SF Bay Area is SO DIFFERENT than off the air broadcast. It is as different as apples vs. ... well, puppies! This isn't like watching local TV stations on Satellite. This is a specialized traffic and weather looping station that we pay for. When I want traffic, I get it simply by turning the station on and listening for a few minutes then I'm done!

Do not listen to the NAB, they don't represent the consumer and they don't represent me.
